GEOGRAPHY: NATURAL GEOGRAPHICAL AND CLIMATE CONDITIONS

Donetsk region is situated in the South-Eastern part of Ukraine. In the South-Western and West it borders on Dnipropetrovsk and Zaporizhzhia regions, in Northern-West on Kharkiv region and in Northern-East on Luhansk region, in the East on Rostov region of the Russian Federation, in the South it is washed by Azov Sea. The territory of the region stretches from north to south over 240 km and from east to west over 170 km. The total area of the region makes up 4,4% of the total territory of Ukraine.

Northern and central parts of the region are Donetsk Ridge, Southern part is Pryazovska Upland. The highest altitude marks within Donetsk Ridge are 200-260 meters. The highest point is the mountain Saur-Mogyla, it is 277 m high. The range of altitude in these regions measures up 200 m.

Hryhorii Bondar is an oncology surgeon, doctor of medicine, professor, academician of the Academy of Medical Sciences of Ukraine, Hero of Ukraine, a name that is known in many countries of the world. The unique proprietary methodology of treatment, which was developed by him, is the "gold standard" that saved dozens of thousands of lives.

John Hughes, a talented engineer and energetic entrepreneur, organized the production process of a multidiscipline metallurgical combine successfully and in tight time limits. He was the first to set up reasonable amounts of iron smelting from the local ores on the local mineral fuel, as well as iron and steel processing.

EMPLOYEES STRUCTURE ACCORDING TO ECONOMIC ACTIVITY

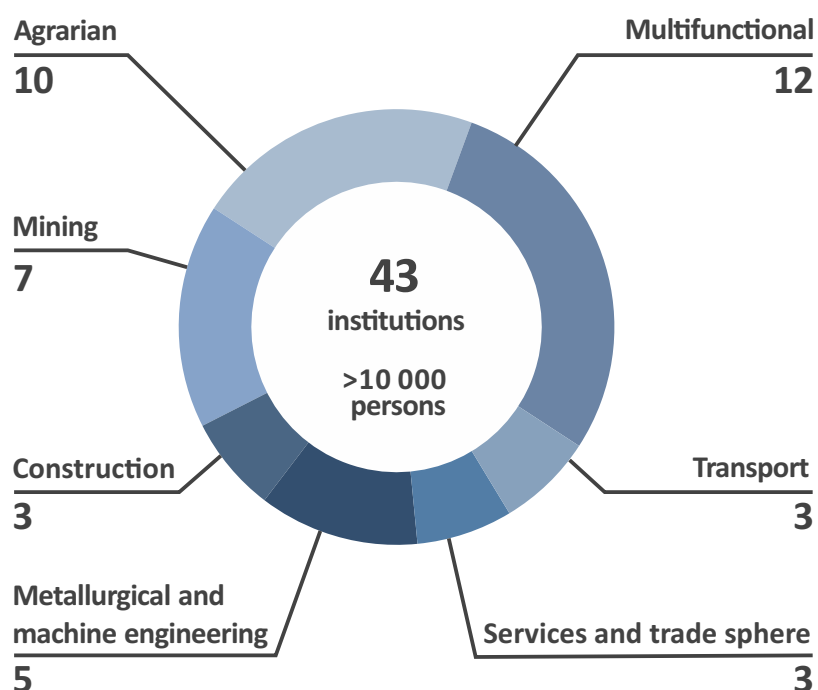

EDUCATION

According to the data on the beginning of 2018-2019 academic year 50 higher educational institutions, vocational undergraduate establishments perform the educational activity. More than 39 thousand of students study at aforesaid institutions.

PROFESSIONAL INSTITUTIONS (ESTABLISHMENTS) (PROFESSIONAL AND TECHNICAL) EDUCATION

According to the results of university admission process of 2018 Donetsk region respectively ranked the 9th position among other regions of Ukraine for the quantity of enrolled undergraduates to the higher educational institutions.

Donbas National Academy
of Civil Engineering and Architecture

Donetsk National Technical University holds the leading position among the institutions of Donetsk region in the TOP-200 Ukraine rating.

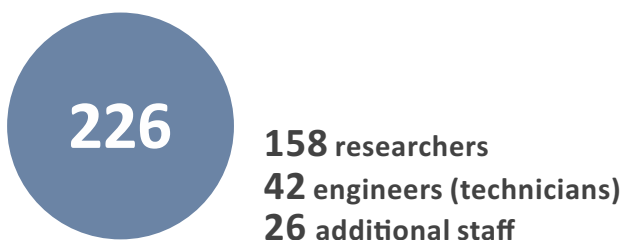

SCIENCE AND INNOVATIONS

Donetsk region respectively ranks the 6th position within Ukraine for the quantity of enterprises that bought new technologies (technical achievements, equipment, know-how).

During 2017 22 enterprises carried out the innovation activity that made up 11,5% of total quantity of industrial enterprises.

QUANTITY OF EMPLOYEES WHO TOOK PART IN PERFORMING OF SCIENTIFIC AND RESEARCH WORK, 2018

LIFE SAFETY

NATURAL ENVIRONMENT
PROTECTION

NATURAL ENVIRONMENT PROTECTION

Donetsk region is a powerful industrial region where historically the largest development have enterprises of metallurgical and chemical complexes, machine building industry and mines. Therefore, the main efforts are directed at the implementation of environmental measures such as:

- solving of complex environmental problems of the region including improvement of the situation concerning the atmospheric air protection;
- restoration of the hydrological regime and sanitary condition of water objects by implementing measures to fortification of the coast and clearing river channels, as well as construction and reconstruction of treatment facilities;
- increase in the number of objects and area of the nature reserve fund;
- reduction of pollutants emissions into the air from stationary sources of pollution;
- solid household waste management solving problems.

EMISSIONS OF POLLUTANTS FROM STATIONARY AND MOBILE SOURCES, THOUSANDS TONS PER YEAR

Information on observation posts measurements of atmospheric air and daily average concentrations in the last 30 days is constantly posted online on the official site of the Department of Ecology and the natural resources of the regional state administration.

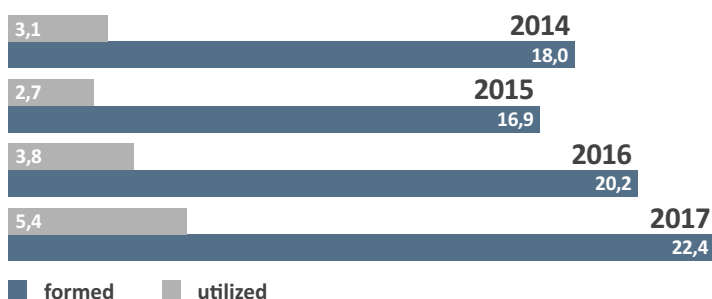

ATMOSPHERIC AIR

The main pollutants of atmospheric air in the region are enterprises of ferrous metallurgy, thermal power plants and enterprises of the coal industry.

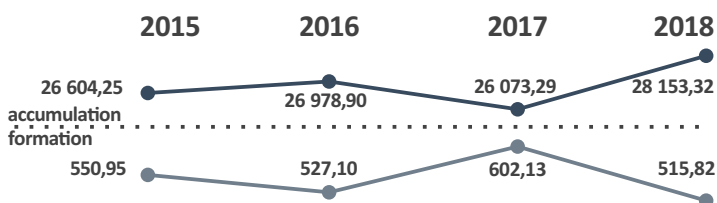

In the region a number of programs and events are being implemented to reduce pollutants in the atmospheric air.

There is an environmental impact computer system in the region. The system of automated atmospheric air monitoring in Donetsk region complies with requirements of EU Directives (2008/50/EU, 2004/107/EU) and includes 7 stationary posts (in Kramatorsk, Bakhmut, Kurakhove, Mykolaivka, Novoluhansk and 2 posts in Mariupol)» and two mobile environmental laboratories for the determination of atmospheric air pollution in cities and districts of the region.

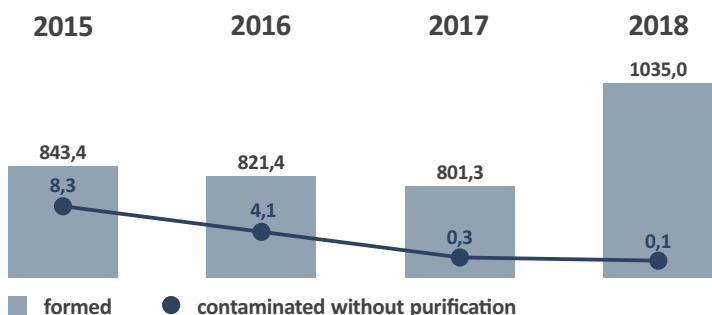

GENERAL QUANTITY OF PRODUCED AND DISPOSABLE WASTE I-IV CLASS OF DANGER, MILLION TONS

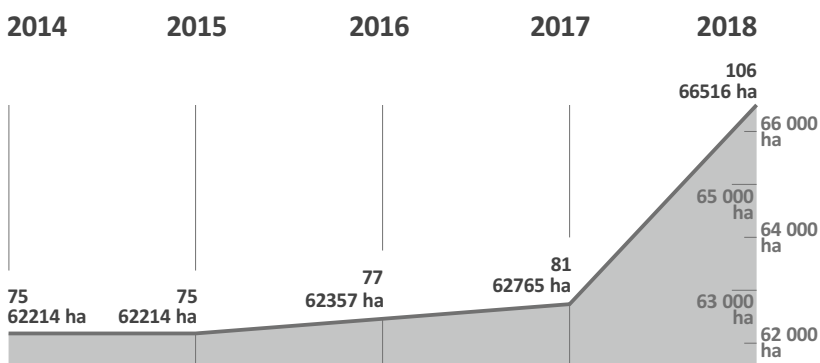

FORMATION AND ACCUMULATION OF DOMESTIC WASTES, THOUSAND TONS

DISCHARGE IN SURFACE WATER OBJECTS, MILLION CUBIC METERS

NUMBER AND AREA OF NATURE RESERVE FUND IN DONETSK REGION IN 2014-2018

FORMATION AND UTILIZATION OF INDUSTRIAL AND DOMESTIC WASTE

The existence of mining, metallurgy, energy and other industries leads to the accumulation of large volumes of industrial waste. The utilization level of industrial waste is about 20% of the formed.

The region has a high population density of 160 people per 1 km², which leads to the formation of a significant amount of household waste.

It is planned to create a network of 4 regional waste recycling centers and 5 regional waste management complexes, which will include regional disposal sites (landfills) of solid domestic waste, waste sorting and waste dumping stations, waste processing enterprises, as well as landfill reclamation which have exhausted their resources.

PROTECTION OF WATER RESOURCES

For the purpose of the crisis monitoring, gauging stations are operated in the experimental operation mode to ensure systematic observations of hydrological and hydrochemical indicators of surface water bodies in substandard-risk zones in the basin of Siverskyi Donets river (2 gauging stations are installed on Siverskyi Donets river) and seawater status (there was installed equipment in Mariupol). Information about the measurements is also displayed online on the official site of Ecology and Natural Resources Department of the Regional State Administration.

DEVELOPMENT OF NATURE RESERVE FUND

In recent years, the number of the objects and area of the nature reserve fund has constantly increased.

HOSPITALITY

TOURISM
SOCIAL SPHERE

TOURISM

Donetsk region is an industrial land, which, at the same time, has a wonderful natural recreational potential. 39% of trips around the region are related to excursions, leisure, festivals and sports and health tourism. The region has over 106 territories and objects of the nature reserve fund.

The sphere of service of tourists includes more than 258 collective accommodation facilities (including 64 hotels and 194 other temporary accommodation facilities), 33 tourist operators and agents.

Great recreational area of Svyatogiria – **“National Nature Park "Holy Mountains”** – located in the picturesque valley of the river Severskyi Donets, whose water retains ancient secrets from the time of "The Lay of Ihor's Campaign". Unique buildings on the chalky rocks of Svyatogorsky Cave Monastery and the unique beauty of the National Nature Park "Holy Mountains" are called Donetsk Switzerland.

Active development gains **extreme tourism**. In the region there are centers of active recreation, hiking, equestrian recreation, water and extreme sports (paragliding), various amusement parks. On the rock cluster in the village of Kremenivka, championships are held annually with the participation of professional rock climbers and beginners at the rock formations in the form of almost steep cliffs at an altitude of 20-25 meters. The beauty of the landscape adds a winding and shallow Kalchyk river. Not far from Kremenivka also annually rally racing drivers is held. In addition, this is a favorite place for cycling walks.

INDUSTRIAL TOURISM

One unique opportunity to get into the intricacies of creating the “wine kings” can be obtained by visiting three industrial workshops of the underground part of **Artwinery**, the only producer of sparkling wines in Ukraine.

During the excursion tourists visit production workshops, see a stack of bottles aged for many years, will be able to taste wine.

Another unique enterprise is a state-owned “**Artemsil**” is one of the largest suppliers of salt to the world market, whose product is supplied to 22 countries of the world. The excursion route takes place at a depth of 288 meters on the worked galleries of the mine. Visitors get a unique opportunity to walk along the bottom of the ancient world ocean, visit the labyrinths of the underground salt kingdom, and see salt sculptures made by craftsmen, salt football field and a unique concert hall that impresses with its size and amazing acoustics.

In addition, the tour has a tremendous therapeutic effect, as it replaces 15 inhalation procedures!

INDUSTRY

Donetsk region is one of the most industrially developed regions of Ukraine, where more than 500 industrial enterprises operate. Each year they produce products worth more than 300 billion UAH.

The basis of the industrial complex is the mining and metallurgical complex, which creates approximately 54% of all industrial products in the region.

The mineral-raw material base of the region is almost 50% consists of energy minerals (coal, gas methane coalfield and natural gas), the main part of which is coal.

METALLURGICAL COMPLEX

The metallurgical complex is a strategically important component of the economy of the Donetsk region. It consists of enterprises of ferrous and nonferrous metallurgy, coke chemical, refractory, flux producing enterprises. The metallurgical complex employs 39 thousand people. The leading enterprises are: PJSC "Mariupol Metallurgical Combine (Complex, Kombinat) named after Ilich", PJSC "Metallurgical Combine (Complex, Kombinat) "Azovstal", LLC "Elektrostal" (Kurakhovo), LLC "Non-ferrous Metals Plant", LLC "Kramatorskyi Ferroalloy Plant", LLC SMA (Scientific and Manufacture Association), PJSC "Chasivoiarskyi Vognetryvkiy (Refractory) Combine (Complex, Kombinat)", JPSC "KDZ" (Krasnoarmiyskyy Dynasovyi (Silica/Dinas) Plant), PJSC "Novotroitske Rudoupravlinia".

Metallurgical enterprises of the region specialize in production of cast iron, steel, metal-rolling products. LLC "Non-ferrous Metals Plant" manufactures products made from non-ferrous metals. Coke plants are specialized in the production of coke and chemical products of coking (ammonium sulfate, coal tar, benzene, pure rectification products). Refractory enterprises produce alum inosilicate, dinasic refractories, unformed materials, extract refractory raw materials - clay and forming sand.

SMALL AND MEDIUM-SIZED ENTERPRISES

“The Regional Program for Small and Medium-Sized Business Development in Donetsk Region for 2017-2018” is being implemented in the region, which aims to create favorable conditions for the development of small and medium-sized enterprises, ensuring employment of the population, and increasing the competitiveness of small and medium-sized enterprises.

As part of program activities, work is underway to implement state regulatory policy, provide financial, credit, logistical, informational and consulting, personnel support of small and medium enterprises.

Starting in May 2017, a pilot project on financial support for small businesses started with the aim of creating a class of small and medium owners in all economic spheres. The project is intended to lay the groundwork for the demonopolization of the region's economy through the formation of a new class of entrepreneurship on the basis of a cluster business model and to facilitate the construction of newly formed territorial communities on the principles of self-sufficiency. Financial support is provided on a competitive basis on a gratuitous and irrevocable basis:

During 2017-2018, according to the results of the competitive selections, 187 business entities received irrevocable financial support in the amount of 78 million UAH funds of regional and local budgets.

There were held training visits of entrepreneurs-winners of competitive selection abroad in order to gain international experience, skill enhancement of Donetsk region small enterprise representatives in the business sphere.

- December 2017 – The Republic of Latvia (direction “Livestock. Poultry”);
- March 2018 – The Federal Republic of Germany (direction “Light industry”);
- October 2018 – The Republic of Poland (directions “Light industry”; “Purchasing groups”);
- November 2018 – The Republic of Poland (directions “Agricultural sector development and processing (HACCP)”; “IT technologies and innovations”).

Total number of persons – 36.

During the visit to Latvia, the participants visited enterprises, farms for cultivation of cattle, sheep, broilers, cheese factories, meat and milk processing shops, met with leading beekeepers, poultry farmers, market forecasting experts and more.

During the visit to Germany, the participants visited light industry enterprises (textile, leather, etc.), manufactures of fashion brands and others.

During the visit to Poland, the participants visited the next companies: “Vadain International”, “Sawex” and “Lemigo”, “PTAK” Exhibition and Trade Center, light industry enterprises, “Batna Grup Warszawa” Purchasing Group, Processing incubator in Dwikozy (promotion center and support for agrarian entrepreneurship), vineyards, horticultural and vegetable group “Zoloty Sad” (Golden Garden), Incubator of innovative Warsaw Polytechnic, Lublin Science and Technology Park (LPNT), information firms having branches in LPNT, Polish cluster of Internet of Things research and development, head offices of “DataArt” and “Convergys” companies. Participants of these training visits were reimbursed for the compensation of expenses related to their stay in these countries (transport, accommodation, insurance, etc.).

ECONOMIC AND BUSINESS PRESENTATION ARRANGEMENTS

Annual holding of:

- International Investment Forum
- “East-Expo” Exhibition
- “Science. Business. Innovations” Regional Forum
- Open Conference of IT Developers

- geological study including experimental industrial development of mineral resources of national importance;
- mining of minerals;
- geological study of oil and gas minerals including experimental and industrial development of minerals with further extraction of oil, gas (industrial development of deposits);
- construction and exploitation of underground structures, not related to the extraction of minerals including the number of facilities for underground storage of oil, gas and other substances and materials, disposal of harmful substances and waste products, wastewater discharge;
- creation of geological territories and objects with an important scientific, cultural, sanitary and recreational values (scientific polygons, geological reserves, nature reserves, health resorts, health resorts institutions, etc.);
- execution of works (implementation of activities) provided for a product sharing agreement.

State Service of Geology and Subsoil of Ukraine:

03057, Kyiv city, Antona Tsedika St., 16
Tel. reception: +38 (044) 536-13-17
Tel. "hot line": +38 (044) 456-23-57

Land use permit

Citizens and legal entities acquire property rights and land use rights from state or communal land property by a decision of the executive authorities or bodies of local municipality within their powers determined by the Land Code or by auction results.

- Village, town and city councils transmit land plots owned or used by land communal property of the respective territorial communities for all needs;
- Regional, district councils transmit land plots in ownership or use from appropriate lands of joint ownership of territorial communities for all needs;
- District state administrations transfer land plots from land of state property (land industry, transport, communication, water fund etc.) owned or used within the villages, settlements, cities of district significance for all needs and outside of settlements for water farms; construction of facilities related to servicing residents of the territorial community district (schools, cultural establishments, hospitals, trade enterprises, etc.).

Chief Administration of State Geodetic Cadastre in Donetsk region in accordance with Part 4 of Article 122 about the Land Code of Ukraine transfers agricultural land plots owned by the state for agricultural needs within norms of Art. 121 of the Land Code of Ukraine and in accordance with the order of the gratuitous privatization of land plots by citizens (Article 118 about the Land Code of Ukraine).

According to the Ordinance of Cabinet of Ministers of Ukraine dated January 31, 2018, No. 60-p since February 1, 2018, the State Geodetic Cadastre has started works on the transfer of all agricultural land plots owned by the state into communal property of corresponding territorial amalgamated communities, except those of the land plots that can not be transferred to the communal property.

By the time of transfer of agricultural land owned by the state into communal property disposal of agricultural lands by transfer for use (solely by way of holding auctions) or in the property, is carried out for agreement with the amalgamated territorial communities and after making their own decisions.

With information concerning the available agricultural land plots owned by the state that is included in the list of land plots, the rights to which will be exposed on land trades (auctions) by the Chief Administration of the State Geodetic Cadastre in Donetsk region can be found on the official website site land.gov.ua.

Chief Administration of the State Geodetic Cadastre in Donetsk Region:

85102, Donetsk region,
city of Konstyantynivka, Yevropeiska St., 13
Tel.: + 38 (06272) 2-11-06, 2-15-23

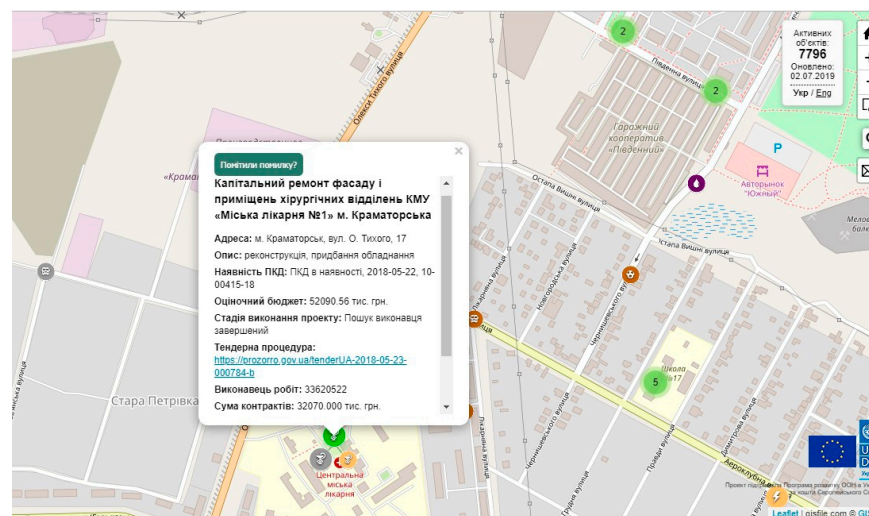

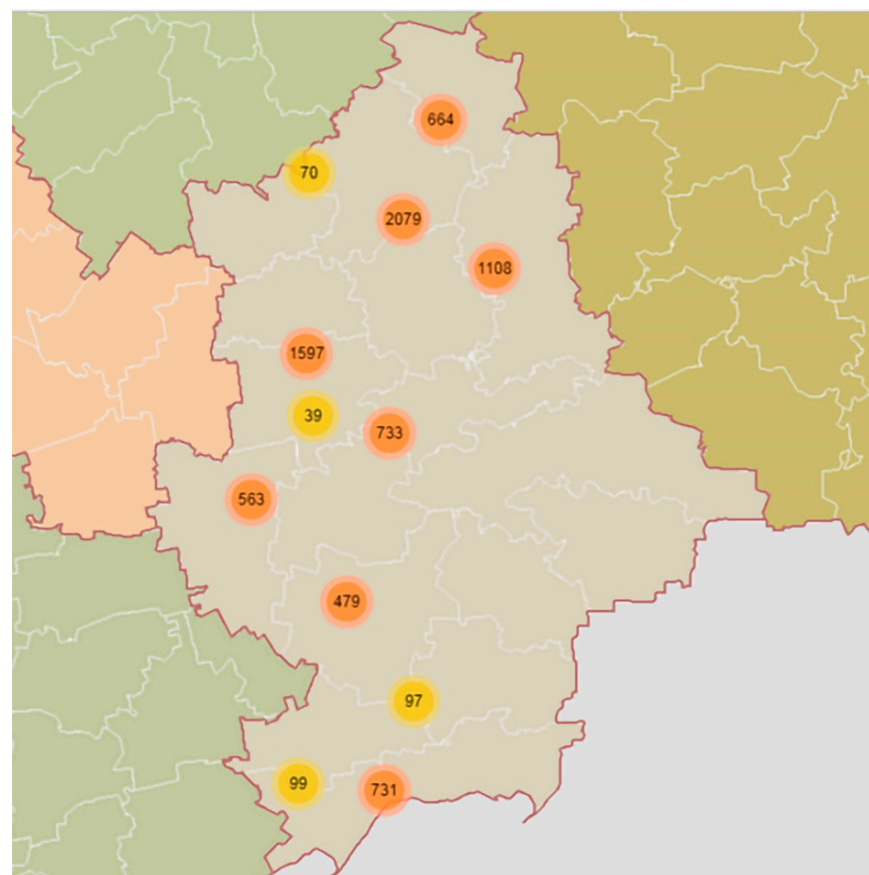

INTERACTIVE PROJECTS MAP OF SOCIAL AND ECONOMIC DEVELOPMENT OF DONETSK REGION

In order to disseminate information about the needs for restoration and development of the region in Ukraine and beyond borders, attraction of investments from different financing sources of the regional state administration with the support of United Nations Development Programme (UNDP) developed bilingual (Ukrainian and English languages) interactive project map of social and economic development of Donetsk region.

Nowadays, the card has about eight thousand projects, among which some projects have already being implemented and projects that need to find sources of financing. The estimated cost of the projects is about 10 billion USD.

Realization of a number of projects is carried out at the expense of various sources of financing: state and private local budgets, international financial organizations and international technical assistance. The information on the map is constantly updated and relevant.

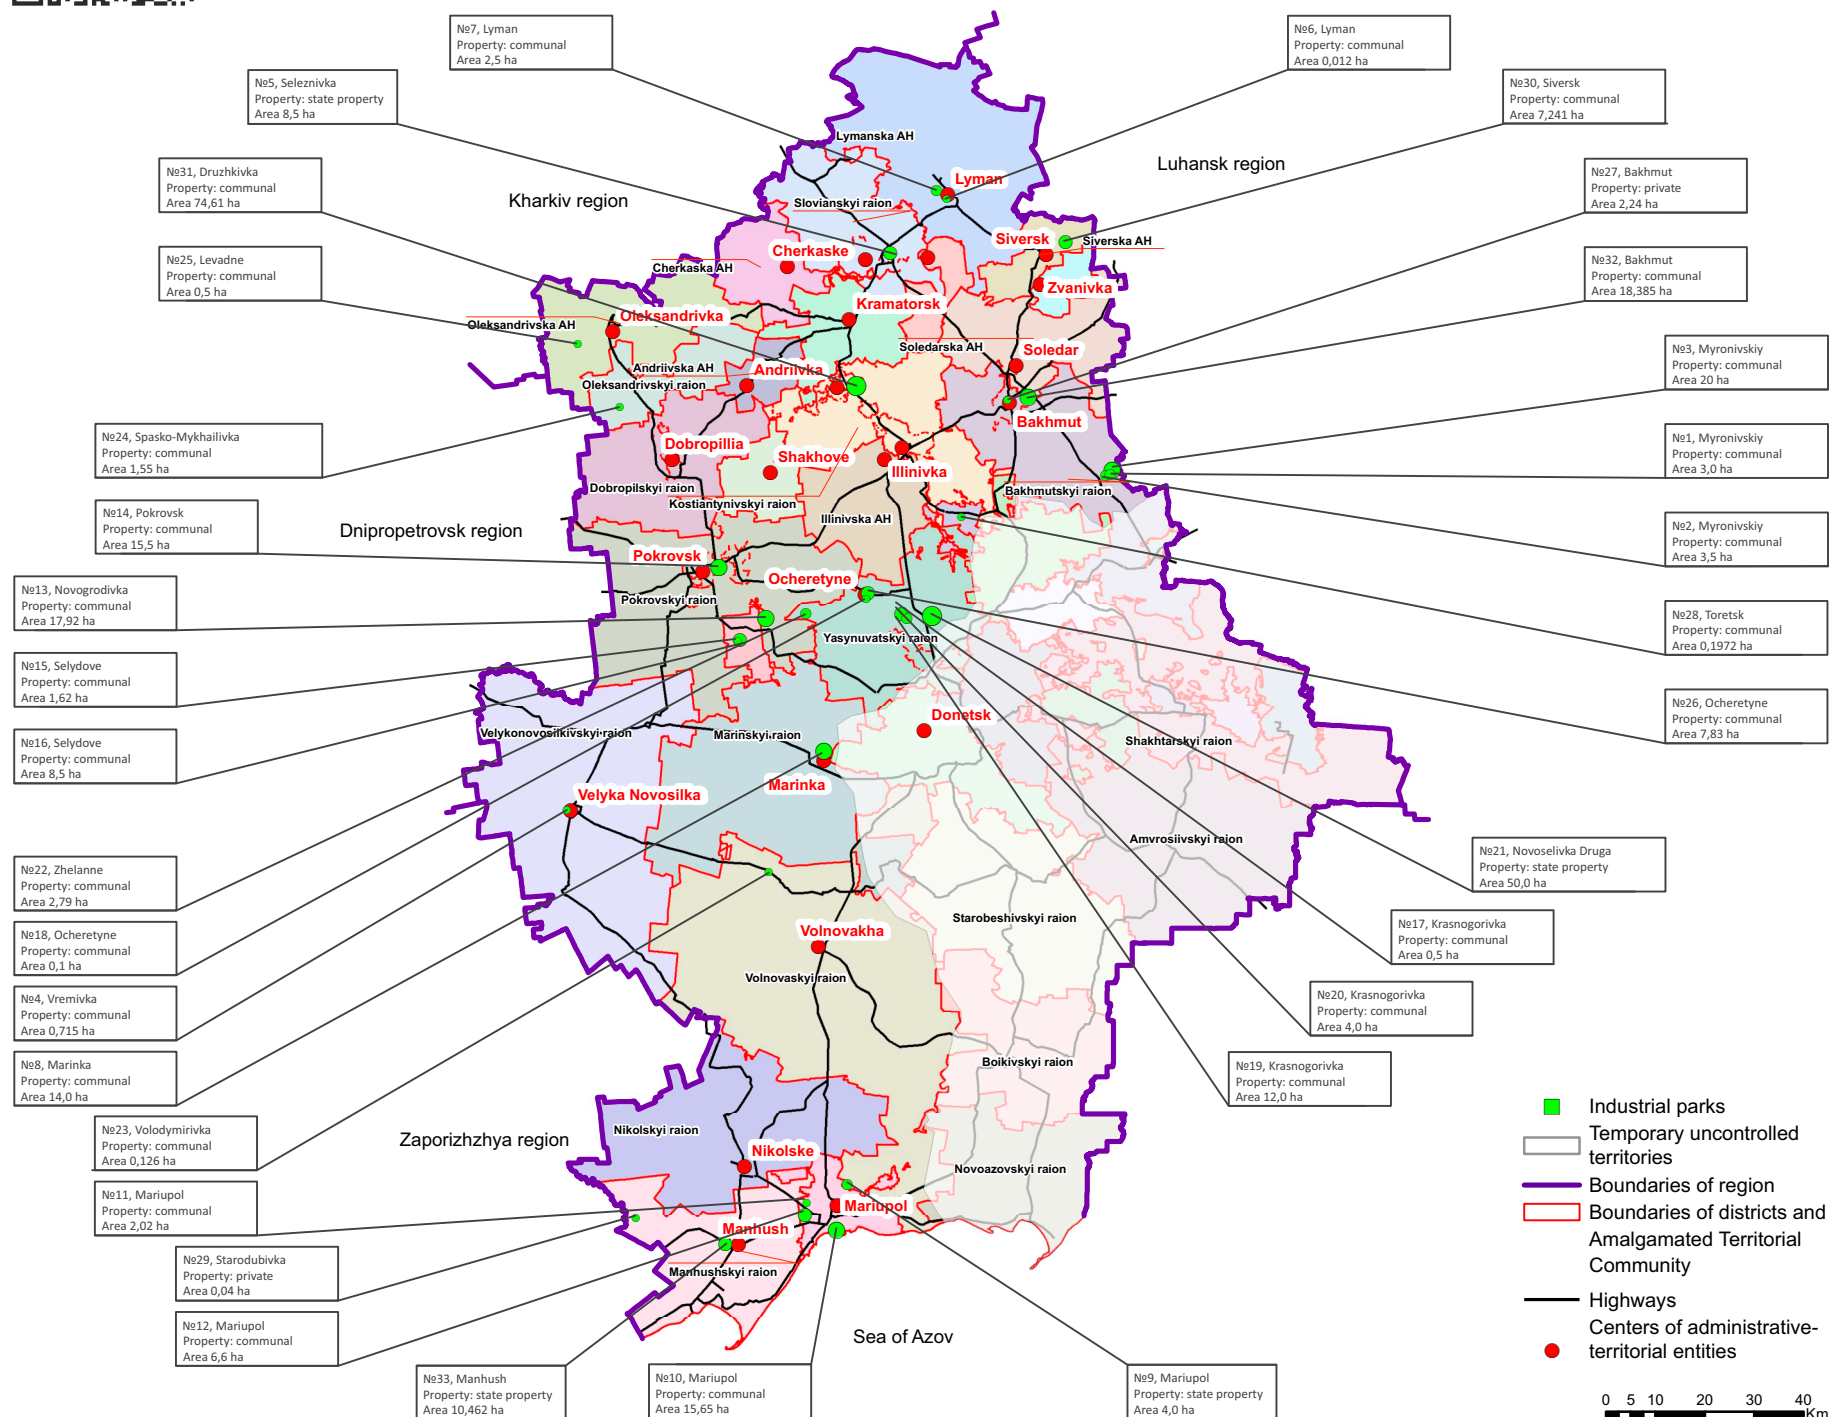

An interactive map is available on the Donetsk Regional State Administration website cba.org.ua/mapd

AVAILABLE LAND PLOTS FOR INVESTMENT

Land plots

PROJECTS SURVEYS

AGRICULTURAL SECTOR

CONSTRUCTION OF AGRO-GREENHOUSE COMPLEX (Bakhmut)

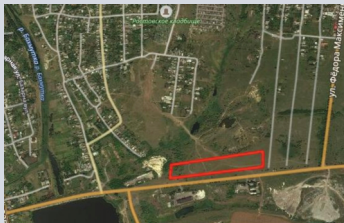

PROJECT OVERVIEW

Project description	The project foresees: construction of high-technological agricultural greenhouse complex and objects of related infrastructure in town of Bakhmut with the use of alternative energy sources technologies. Agricultural greenhouse complex will have fully integrated production cycle: cultivation, yield, freezing, processing and sale of vegetable and fruit crops; cultivation and sale of ornamental gardening production in order to meet own requirements
Goods/Services	Cultivation and sale of fresh and fresh-frozen berries, fruit, vegetables; ornamental plants

INVESTMENTS REQUIREMENTS

Rate and type	Total investment volume ~ 15 000 000 USD (Attraction of investor as the enterprise owner)
Details	The project foresees: site preparation (conduction of utility and other line systems); construction of greenhouses' facilities; construction of processing workshop, construction of facilities equipped with refrigerating chambers; construction of storage facilities; construction of wholesale base. Approximate project implementation period – 3 years

LOCATION AND INFRASTRUCTURE

Location	Tseglianyi alley, Bakhmut, Donetsk region, 84500. Distance to Kramatorsk ~ 55 km
Land plot	Land plot/area size: ~ 3 ha Legal status: communal property Designated purpose of usage: industrial lands/agricultural lands Current use: is out of use/not used 
Infrastructure	Access to transport infrastructure: well-developed infrastructure, distance to the nearest point of railroad connection ~ 6 km Availability and distance to communal infrastructure: technical feasibility for connection to engineering and other service lines is available

REGULATORY LEGAL ASPECTS

Necessary permissions and licenses	Plot usage permit. State registration of the enterprise. Food product quality certificates

FOUNDATION OF GREENHOUSE COMPLEX FOR VEGETABLE GROWING on the eastern region of Ukraine

PROJECT OVERVIEW

Project description

Foundation of greenhouse complex for vegetable growing (cucumbers, tomatoes).
Purchase of complete plastic foil greenhouse for growing of vegetable crops is foreseen by the aforesaid project

Goods/Services

Cultivation (growing) of agricultural production – vegetables: cucumbers and tomatoes

INVESTMENTS REQUIREMENTS

Rate and type

Project value – 130 000 USD (50% credit currency and 50% private resources)

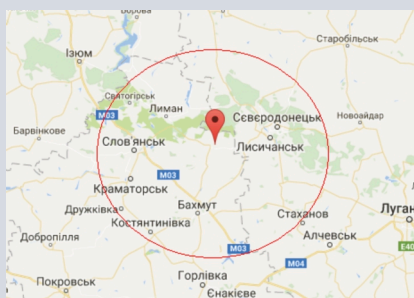

Details

Preparatory phase makes up 6 months (carrying out of engineering, construction of greenhouse and conducting of utility systems, implementation of purchase of necessary equipment and materials). The greenhouse is planned to be set up during the project year.
Anticipatory profit – approximately 28 000 USD per year.
Payoff period – 5 years

LOCATION AND INFRASTRUCTURE

Location

Siversk, Bakhmutskyj district,
Donetsk region

Land plot

Land plot/area size: area of greenhouse complex – 1500 sq.m,
total space – 1700 sq.m
Legal status: communal property
Designated purpose of usage: agricultural lands
Current use: is out of use/not used

Infrastructure

Access to transport infrastructure:
to the nearest motorway 100 m; to the nearest junction of highways and motorways which connect the cities Lysychansk (25 km), Bakhmut (30 km), Lyman (25 km), Severodonetsk of Lugansk region (50 km), Kramatorsk (70 km), with regional and industrial center city Kharkiv (200 km); to the nearest railway station that is opened for cargo handling operations makes up 2 km (station Siversk)
Availability and distance to communal infrastructure:
electricity, stand-by heat supply, sewage facilities net – approximately 50 m

PROJECTS SURVEYS

AGRICULTURAL SECTOR

CONSTRUCTION OF MODERN ELEVATOR

PROJECT OVERVIEW

Project description

The project foresees: construction of modern grain elevator with siding facilities and utilities, covering the volume up to 20 000 tons of single use storage, having discharge capabilities up to 200 tons per hour. The aforesaid project will offer an opportunity to make a profit of agricultural activity, to attract modern technologies into agricultural sector, to establish well-developed production complex, to provide employment opportunities

Goods/Services

Acceptance, refining, drying, storage and shipping of grain

INVESTMENTS REQUIREMENTS

Rate and type

Project value – 4 000 000 USD (70% loan proceeds, 30% - own resources of cooperative society members)

Details

Preparatory phase makes up 6 months – 3 000 000 USD: (carrying out of engineering, conducting of utility systems (electrical grid, etc.), and railway, implementation of necessary equipment and materials purchase. The second staging point – 1 000 000 USD, construction of elevator, extending the railroad to the elevator, connection to electric network and gas-supply system. Commencement of elevator work.
Payoff period: 6 years

LOCATION AND INFRASTRUCTURE

Location

Pereizne, Bakhmut'skyi district, Donetsk region.
Distance to the nearest regional center – Bakhmut (25 km), Kramatorsk (70 km)

Land plot

Land plot/area size: total area of the land plot – 2,0 ha
Legal status: governmental property. Land lease contract
Designated purpose of usage: pasture. The alteration of designated purpose of usage is planned before commencement of works regarding the elevator construction
Current use: is out of use
Project conception: there are necessary accessory structures for storage of equipment and construction materials during the period of building process, there is free land plot for construction site with the area up to 16 ha

Infrastructure

Access to transport infrastructure:
distance to the nearest motorway – 100 m (asphalt road. Distance to the railway – 1 km)
Availability and distance to communal infrastructure:
distance to gas distribution plant – 1 km, to electrical networks – 500 m,
to water supply - borehole

Goods/ Services	Drinking water bottling into 5 liter PET bottles
Market overview	Consumers: citizens of Volnovakha district (50 thousand people) and citizens of Mariupol (500 thousand people)

INVESTMENTS REQUIREMENTS

Rate and type	The total project need of finances is EUR 831 000. Type of investment promotion: credit funds; public-private partnership.
Details	Construction and installation works - EUR 367 500. Equipment, furniture, implements - EUR 217 850. Other expenses - EUR 103 500. Circulate assets - EUR 142 150. Internal rate of project return – 21.3%. Payback period - 58 months.

LOCATION AND INFRASTRUCTURE

Location	Vilne, Volnovakha district, Donetsk region; distance to Kramatorsk - 140 km, to Mariupol - 75 km, to Volnovakha - 35 km
Land plot	Plot/Area: 0.015 km ² . Legal status: communal property. Intended use: land for the industrial enterprises and structures. Current use: nonfunctioning industrial objects.
Infrastructure	Access to the transport infrastructure: railway station Zachativka - 10 km, highway Volnovakha - Zachativka - distance 2 km. Availability and distance to the communal infrastructure: on the site of PTS- 180 kW

RESOURCES AND SERVICES

Access to the resources and services	Availability of resources required: Availability of artesian wells.
Characteristics of available property	Availability of buildings / structures and their characteristics: storeroom – 84.3 m ² , one-storeyed storeroom – 167.0 m ² , one-storeyed premise – 27.2 m ² , one-storeyed premise – 278.3 m ² , one-storeyed The condition of the premises is satisfactory, repair and dismantling are required. The territory is 1.8 ha, surrounded by a metal fence.

REGULATORY LEGAL ASPECTS

Necessary permissions and licenses	Permit for special water use.

INVESTMENTS REQUIREMENTS

Rate and type	Total project value: 6 000 000 EUR. Investment requirements: 60% (3 600 000 EUR)
Details	Payoff period: 3 years

LOCATION AND INFRASTRUCTURE

Location	Sviato-Georgijevska St., Bakhmut, Donetsk region, Ukraine, 84500
Land plot	Land plot/area size: 20 ha Legal status: Ltd “Energo Industry” is getting the documents ready for renting the aforesaid land plot on the grounds of decree issued by Bakhmutska municipal council. Designated purpose of usage: manufacture of electric energy Current use: is out of use
Infrastructure	Access to transport infrastructure: well-developed transport infrastructure, distance to city of Kramatorsk ~ 55 km Availability and distance to communal infrastructure: access to energy distribution systems is specified by technical conditions of public joint-stock company “Donetsk Fuel and Energy Complex Donetskoblenergo”

REGULATORY LEGAL ASPECTS

Necessary permissions and licenses	Electric energy producing license and approved “Green pricing”
Ecological restrictions and requirements	N/A
Current privileges and challenges/motivation	“Green pricing” mechanism

PROJECTS SURVEYS

ENERGY SECTOR

CONSTRUCTION OF ALTERNATIVE FUELS MINI-CO-GENERATION PLANT

PROJECT OVERVIEW

Project description	The aim of the project is construction of alternative fuels (pellets, firewood) mini-co-generation plant. This enables to reduce natural gas usage and to change over usage of solid fuel which is produced within the region and this fact will assist the coal production and alternative solid fuels (briquettes, pellets)
Goods/Services	Energy production – 1500 kWh, heat generation – 7,6 mWh

Contact details:
Luhanskyi Andriy Oleksandrovych
deputy chief of mayor
85300, Donetsk region,
Pokrovsk, Shybankov Sq., 11
tel.: +38 (06239) 52-17-69
E-mail: krs.v@dn.gov.ua

INVESTMENTS REQUIREMENTS

Rate and type	Total project value: 26 100 000 USD under conditions of co-investment, state-private partnership
Details	<p>The project foresees the entire remodeling of heat supply facilities:</p> <ol style="list-style-type: none">1. Technical re-equipment of boiler room № 8 microdistrict Shakhtarskyj and removal of thermal capacity onto the boiler room № 1 of microdistrict Lazurnyi2. Technical re-equipment of boiler room № 1 of microdistrict Lazurnyi <p>Project implementation period – 2 years. Annual income of heat disposition – 21 840 000 UAH, annual income acquired from sale of electric energy – 16 160 000 UAH. Average time of payoff period makes up 5 years</p>

LOCATION AND INFRASTRUCTURE

Location	Boiler room № 1: Lazurnyj microdistrict, Pokrovsk, Donetsk region Boiler room № 8: Shakhtarskyi microdistrict, Pokrovsk, Donetsk region
Land plot	<p>Land plot/area size: building site is planned to be situated on the territory of existent boiler room № 1 (area of the territory 1,2829 ha, building area 0,41 ha) and boiler room № 8 (area of the territory 0,8 ha, building area 0,23 ha)</p> <p>Legal status: communal property</p> <p>Designated purpose of usage: siting and exploitation of pipeline transport (in accordance with Classification of designated purpose of land usage, code 12.06)</p> <p>Current use: part of the building site foreseen for the construction of mini co-generation plant is partially built-up at the moment and it is out of use (not used)</p>
Infrastructure	<p>Access to transport infrastructure: there are sewerage system, water supply, fire piping, cable system, illumination, gas supply on the territory of boiler rooms №1 and №8. Capacity volume is enough for performing of manufacture process</p>

CONSTRUCTION OF A MODERN WIND-ELECTRIC GENERATING PLANT with a capacity of 69 MW

PROJECT OVERVIEW

Project description	Construction and operation of a modern wind-electric generating plant with the capacity of 69 MW (hereinafter WF), consisting of twenty wind turbines with the capacity of 3.45 MW each produced by the Danish company "VESTAS", 2 transformer substations - TS 35 kW, central distribution station - CDP 110 kW. WF - converts wind energy into electrical energy with subsequent transmission to the United Energy System of Ukraine (UES of Ukraine).
Goods/Services	Electrical power.

INVESTMENTS REQUIREMENTS

Rate and type	The cost of the project is UAH 2,710.0 million, including: UAH 10 000 000 of own funds for preparatory and geological research works. UAH 2 700 000 000 of investor funds. Type of investment promotion - credit, other options are possible.
Details	Investment resources are mastered in stages: - The first start-up complex with the capacity of 17.25 MW (5 wind turbines, 2 TD, CDP, air networks for connection, engineering services, reconstruction of the Pryazovskyi power center). The need for investment is UAH 999 000 000. - Second start-up complex with the capacity of 51.75 MW (15 wind turbines, engineering services). Estimated annual profit after tax - UAH 491 000 000. The payback period of the wind-electric generating plant is 5.5 years

LOCATION AND INFRASTRUCTURE

Location	The territory of the Yalta Village Council of Manhush district of Donetsk region, outside the settlements
Land plot	Plot/Area: The total area of the WF is 1.92 ha which consists of: 20 plots for wind turbines; 2 plots for TS-35kW; 1 plot for the 110kW CDP. Legal status: State property, Lessor - Donetsk Regional State Administration, lessee CompAltEG LLC (ТОВ «КомпАлТЕГ») Intended use: for the placement, construction, operation and maintenance of buildings and structures of energy-generating enterprises facilities, institutions and organizations. Current use: Lands for the energetics sector.
Infrastructure	Access to the transport infrastructure : distance to: highway T 0523 - 2 km; seaport - 33 km; railroad - 33 km. Availability and distance to the communal infrastructure: water supply system - 6 km; gas pipeline - 5 km; electric grid - 2.7 km; sewerage network - 12 km

REGULATORY LEGAL ASPECTS

Necessary permissions and licenses	Building commencement permit. Electricity generation licence is obtained at the moment of starting of the first start- complex.
Ecological restrictions and requirements	Environmental impact assessment.

PROJECTS SURVEYS

ENERGY SECTOR

CONSTRUCTION OF THE WIND-ELECTRIC GENERATING PLANTS for the electric power supply of the pumping stations of the 1st and 2nd rises of the Siverskyi Donets-Donbass canal

PROJECT OVERVIEW

Project description	This project proposes the creation of the wind-electric generating plants with a total production capacity of 30 MW in the immediate vicinity of the pumping stations of the canal on Slaviansk district lands, which are allocated for permanent use of the “Company Voda Donbasu” PUC (КП «Компанія «Вода Донбасу») for the first band of the sanitary and protection zone of the Siverskyi Donets-Donbass canal. There is planned to have 15 VG for the pumping stations of the 1st rise and 16 VG at the pumping stations of the 2nd rise for the electric power supply, needed to compensate of the pumping stations consumption. During the development of this project, the experience of construction of the DTEK Renewables and equipment of Fullander Windtechnology LLC was used, which is the first enterprise of Ukraine which produces the multi-megawatt class wind-driven power-plant.
Goods/Services	Electricity of the renewable sources.
Market overview	“Company Voda Donbasu” PUC, electricity market.

Contact details:
Zavodovskyi Viktor Oleksandrovych,
Investment and Prospective
Development Director
“Company Voda Donbasu” PUC
87547, Donetsk region,
Mariupol,
Mytropolytyska Str., 177a;
tel.: +38(050) 471-41-43
E-mail: info@donvoda.com

INVESTMENTS REQUIREMENTS

Rate and type	Cost of the project: EUR 158 100 000. Type of investment promotion: credit, public-private partnership.
Details	Gross annual income is EUR 9 300 000, with a payback period of 17 years.

LOCATION AND INFRASTRUCTURE

Location	Donetsk region, Slaviansk district. The distance to Slavyansk and Kramatorsk is 20km.
Land plot	Plot/Area : 6.66km ² . Legal status: Land in permanent use of the “Company Voda Donbasu” PUC. Intended use : Water resource lands. Current use : Zone of the first chord of the sanitary-protection of the Siverskyi Donets-Donbass canal.
Infrastructure	Access to the transport infrastructure: There is available the technological asphalt road along the canal. Availability and distance to the communal infrastructure: There are available 110 kV ISD at pumping stations of the first and second rises.

REGULATORY LEGAL ASPECTS

Necessary permissions and licenses	Obtaining a license for the production of wind electricity. The term is 6 months.
Ecological restrictions and requirements	Placement of the wind-electric generating plants in the first band of the sanitary and protection zone of the Siverskyi Donets-Donbass canal.
Current privileges and challenges/motivation	Ability for the realisation of the generated wind electricity at a “green” tariff.

CONSTRUCTION OF THE SOLAR ELECTRIC GENERATING STATIONS at the filter stations of the “Company Voda Donbasu” PUC

PROJECT OVERVIEW

Project description	Installation of rotating solar panels on the roofs of industrial buildings of eight filter stations, which belong to the “Company Voda Donbasu” PUC (КП «Компанія «Вода Донбасу»), is assumed. Some of the generated electricity will be used for own use, and the surplus is expected to be sold at a “green tariff”. Attractiveness of the project: the land is in permanent use, the electricity consumer is the owner of the land and structures, operation and maintenance of the equipment is assumed by the station staff. Profit is obtained by the difference in tariffs for electricity used by the consumer. (In the day the surplus is sold at the “green tariff” - 5.4 UAH/kW, and at night it is bought at the tariff of the 1st category -1.83 UAH / kW.)
Goods/Services	Electricity generation.
Market overview	Provision of electricity of filter stations and sale of surpluses at the “green tariffs”.

INVESTMENTS REQUIREMENTS

Rate and type	The cost of the project is EUR 15 575 000. The type of investment promotion - grant or a joint venture.
Details	The expected rate of return according to the “green tariff” will be around EUR 11 100 000 per year. The payback period will be 17 months.

LOCATION AND INFRASTRUCTURE

Location	Donetsk region.
Land plot	Plot/Area: The total area of the sections of the eight filter stations is 1.26 sq. km. Legal status : Land is in permanent use of the “Company Voda Donbasu” PUC. Intended use : Economic activity. Current use : Production of drinking water. Project understanding: Land plots are located outside of the settlements and have sanitary and protection zones.
Infrastructure	Access to the transport infrastructure: Distance to the nearest settlements is not more than 10km. All filter stations have driveways and railroad entrances. Availability and the distance to communal infrastructure: Filter stations have all the necessary infrastructure services.

REGULATORY LEGAL ASPECTS

Necessary permissions and licenses	Obtaining a license for the production of solar electricity. The term of registration is 6 months. Development of the project documentation - 1 year. Permission to start the construction works - 1 month.
Current privileges and challenges/motivation	Ability for the realisation of the generated solar electricity at the “green tariff” prices

INVESTMENTS REQUIREMENTS

Rate and type	230 000 USD, loan
Details	Payoff period: 4 years

LOCATION AND INFRASTRUCTURE

Location	Kostiantynivka, Donetsk region distance to Kramatorsk 35 km	
Land plot	Land plot/area size: 18 ha. Legal status: communal property Designated purpose of usage: industrial lands Current use: is out of use/not used Project conception: there are not any buildings or other constructions	
Infrastructure	Access to transport infrastructure: there is a highway of federal importance T0504 across the city. There is a railway across the city Availability and distance to communal infrastructure: communal infrastructure is not available	

REGULATORY LEGAL ASPECTS

Necessary permissions and licenses	Permissions and licenses according to the leading of activity of special-purpose quarry for sandstone extraction
Ecological restrictions and requirements	Permissions for leading of activity of special-purpose quarry for sandstone extraction

PROJECTS SURVEYS

CONSTRUCTION MATERIALS

CONSTRUCTION OF A PLANT FOR THE PRODUCTION OF THERMAL INSULATION MATERIALS based on basalt fiber

PROJECT OVERVIEW

Project description	Creation of modern production of basalt thermal insulation products of an innovative new class of composite materials with a capacity of 30 thousand tons of final products per year. The use of basalt thermal insulation in construction helps save up to 40% of heat. Basalt fibers are environmentally friendly, do not emit hazardous substances in air and aquatic environments, not flammable, explosive and carcinogenic.
Goods/Services	Thermal insulation boards for insulation of facades, walls, floors and roofs; mats, backed with aluminium foil, for thermal and sound insulation; cylinders for pipelines insulation.
Market overview	Used in the construction of industrial facilities with high fire safety, including nuclear power plants, chemical and petrochemical factories, high-rise buildings, shipbuilding, rail car manufacturing, automotive and aviation industries. Key consumers: construction companies, industrial enterprises, thermal power facilities and individuals

Contact details:
Iordanov Yevhen Volodymyrovych,
Project Manager
tel.: +38(050) 688-52-45
E-mail: evwlad777@gmail.com

INVESTMENTS REQUIREMENTS

Rate and type	Project cost: USD 47 000 000. The type of investment promotion - credit funds.
Details	External investment funds will be allocated to: purchase of equipment; design and survey works for the construction of administrative, domestic, auxiliary and storage facilities; purchase of technological transport. Performance indicators of the investment project IRR (%) - Internal Rate of Return = 17.281 NPV (\$) - Net present value = 24,751,360.0. PI (%) - Return on Investment Index = 1.539. PP (years) - Payback period = 2.79. DPP (years) - Discounted payback period = 2.6. The projected capitalization in 4 years at a discount rate of 5% is planned at USD 63 000 000.

LOCATION AND INFRASTRUCTURE

Location	Lyman, "LYMANSKYI" Industrial Park
Land plot	Plot/Area: Required area of land for the plant construction 0.07km ² . Legal status: Communal property lands. Purpose of use: Industrial land.
Infrastructure	Access to transport infrastructure: Distance to the national standing highway - 18.4 km; to the freight train station - 15 km. Availability and distance to communal infrastructure: Electric power supply: ПЛ 35/10/04 with a capacity of 7.0 MW. Distance 1km. Gas supply: medium pressure gas pipeline, diameter 320mm. Distance to gas reducing station 1km. Water supply system and sewerage capacity of 150m ³ / hour, within the site.

RESOURCES AND SERVICES

Access to resources and services	Availability of resources required: Crushed trap rock of 70-100mm fraction from the basalt quarries of Rivne region is used for the production of thermal insulation materials..
---	--

REGULATORY LEGAL ASPECTS

Current privileges and challenges/motivation	State support for participants of industrial parks (Article 36 of the Law of Ukraine "On Industrial Parks"); allowance of customs clearance of equipment (Article 287 of the Customs Code of Ukraine)
---	---

WASTE RECYCLING

FOUNDATION OF THE ENTERPRISE DEALING WITH RECYCLING of solid domestic waste in Mariupol

PROJECT OVERVIEW

Project description	By the project is foreseen the following: the foundation of the enterprise dealing with recycling of solid domestic waste with additional manufacture cycle on the operating disposal site. Project capacity of the waste recycling enterprise – 200 thousand tons per year. Implementation of the project will offer an opportunity to extract from the solid domestic waste volume and to bring into effect useful materials (recyclable materials): paper, plastic, glass, metal scrap etc. Extracted raw materials should be recycled in order to get the additional income
----------------------------	---

Goods/Services	Principal product is recyclable materials and electric energy
-----------------------	---

INVESTMENTS REQUIREMENTS

Rate and type	55 000 000 USD. Type of investment promotion – contribution into charter fund or line of credit. Foundation of common (public) enterprise on mutually beneficial conditions
----------------------	---

Details	Project implementation period – 24-30 months: I stage – construction of waste sorting line – 300 000 USD; II stage – foundation of solid domestic waste recycling enterprise – 54 700 000 USD
----------------	---

LOCATION AND INFRASTRUCTURE

Location	Mariupol, Donetsk region
-----------------	--------------------------

Land plot	<p>Land plot/area size: area of disposal site dealing with recycling of solid domestic waste 17,33 ha</p> <p>Legal status: communal property</p> <p>Designated purpose of usage: for siting and exploitation of the buildings and constructions of industrial companies</p> <p>Current use: location of disposal site dealing with recycling of solid domestic waste</p>	
------------------	--	---

Infrastructure	<p>Access to transport infrastructure: distance to commercial seaport – 17 km, to the railway – 10 km, to the Zaporizhzhia airport – 270 km</p> <p>Availability and distance to communal infrastructure: electrical supply networks – 500 m (TP 6 kV); process technical water (borehole). Distance to the nearest gas pipeline approx. 10 km</p>
-----------------------	---

REGULATORY LEGAL ASPECTS

Current privileges and challenges/motivation	According to the Law of Ukraine “About energy sector” the enterprises that produce electric energy of alternative fuels have the right to sell it and the state is obliged to buy it for that is referred to “Green pricing” that exceeds wholesale rates. Land tax: electricity producers of renewable energy source can get 75% reduction for land tax

CONSTRUCTION OF BIO-GAS COMPLEX of economic and faeces effluents

PROJECT OVERVIEW

Project description	Use of silt of municipal waste treatment facilities as raw products for bio-gas plant with acquiring of biogas, electric energy and heat generation with the following processing of silt residues produced by biogas plant in pyrolysis or pellet plant, production of carbon dioxide for industrial purposes having the prime cost around two times less than carbon dioxide produced traditionally are foreseen by the project stipulations
Goods/Services	Principal product is biogas that transforms into electric energy, heat generating or mechanical power and carbon dioxide

Contact details:
Grysko Yevhen Volodymyrovych,
private enterprise "Askona"
87500, Donetsk region,
Mariupol, Brestska St., 32
tel.: +38(097) 224-24-70
E-mail: askona_m@ukr.net

INVESTMENTS REQUIREMENTS

Rate and type	5 100 000 EUR. Type of investment promotion – line of credit
Details	Value of biogas equipment referred to as key- ready, including cogeneration plant makes up approx. 5 100 000 EUR. Project implementation period – 10-18 months. Payoff period: 3-6 years

LOCATION AND INFRASTRUCTURE

Location	Mariupol, Donetsk region
Land plot	Land plot/area size: foundation of new enterprise on the area of the station of biological elimination Communal Enterprise "MVU VKG" is foreseen Designated purpose of usage: industrial lands
Infrastructure	Access to transport infrastructure: commercial seaport, railway Availability and distance to communal infrastructure: distance to the objects of communal infrastructure will be determined after specification of necessary land plot

REGULATORY LEGAL ASPECTS

Necessary permissions and licenses	Necessary permissions and licenses are available, namely: Certificate № 285451; Certificate № 459277; License № 525004 Permission № 575.03.14.45.21.1; № 2466.13.14; № 2981.13.14; № 0593.15.14; № 0592.15.14
Ecological restrictions and requirements	Any ecological restrictions are not specified
Current privileges and challenges/motivation	According to Tax Code of Ukraine the following privileges are assured: profit tax: - 50% of income is tax free - enterprise income is exempted from taxation till 01.01.2020 - tax on income is not liable to tax, investor contributes recourses for development of own manufacture and for enhancement of efficiency. VAT: VAT exemption for equipment and material import. Land tax: 75% reduction for land tax. "Green pricing": According to the Law of Ukraine "About energy sector" the enterprises that produce electric energy of alternative fuels have the right to sell it and the state is obliged to buy it for that is referred to "Green pricing" that exceeds wholesale rates in 2,6 times as much

Availability and distance to utility infrastructure : Water supply, water disposal - 2.5 km; gas supply - 0.8 km, electric power supply - 0.5 km</p>

PROJECTS SURVEYS

CULTURE AND SPORTS

RECONSTRUCTION OF THE OLIMPIIETS SPORTS COMPLEX

PROJECT OVERVIEW

Project description

The project envisages the creation of a modern multifunctional sports complex to ensure the development of physical culture and sports and support of the leading sportsmen of the region through the reconstruction of a non-working sports complex. The project provides for two start-up complexes:

The first start-up complex:

- reconstruction of the stadium;
- reconstruction and improvement of the entrance unit (colonnade with an area of 88 sq.m and two cash offices of 21.4 sq.m),
- arrangement of an eastern grandstand with 4,000-seats with an area of 2 370 sq. m. with stadium maintenance facilities, sports sections and offices.

The second start-up complex:

- installation of the manege building with sandwich panels with a total area of 2800.5 sq.m.,
- arrangement of two parking areas (for 63 and 48 car seats),
- the western grandstand for 2,070 spectators,
- construction of a residential hotels of 2 237,12 sq.m. for short-term stay of athletes (40-60 rest rooms).

Goods/ Services

Health and fitness, sports services (including sports school services).

INVESTMENTS REQUIREMENTS

Rate and type

USD 8 700 000 under co-financing terms, public-private partnership.

Details

The project envisages the reconstruction of the stadium and the construction of outdoor sports venues, the construction of two open parking areas, a warehouse and auxiliary facilities, as well as a gym hall of the manege type and a residential hotel with dwelling units and recreation rooms.

Project implementation period is 12 months. It is planned to create 120 jobs.

LOCATION AND INFRASTRUCTURE

Location

Olimpiiets Sports Complex: 19/1 Yuzhnyi microdistrict, Pokrovsk, Donetsk Region. The complex has a convenient location (bordered on the Yuvileinyi Culture and Recreation Park, city microdistricts) and has public transport accesses.

Land plot

Plot/Area: Land area - 4.9 hectares; building area - 15615,8 sq.m.

Legal status: Communal property.

Intended use: For the construction and maintenance of physical culture and sporting objects (according to the Land Purpose Classification, code 07.02).

Infrastructure

Access to the transport infrastructure:

The construction entity is located within Pokrovsk. 500 m to the Donetsk-Kiev highway.

Availability and distance to the communal infrastructure:

There are sewerage, water supply line, fire piping, cabling, lighting on the territory of the sports complex. The available capacity is sufficient for the functioning of the sports complex.

RESOURCES AND SERVICES

Access to resources and services

Availability of resources required:

The premises are connected to the power supply system (the supplier is DTEK Donetskoblennerho PJSC),

water supply and water disposal (the supplier is Pokrovskvodokanal Public Utility).

And you thought that Ukraine was just something simple.

Ukraine is awesome. Ukraine is exclusive.

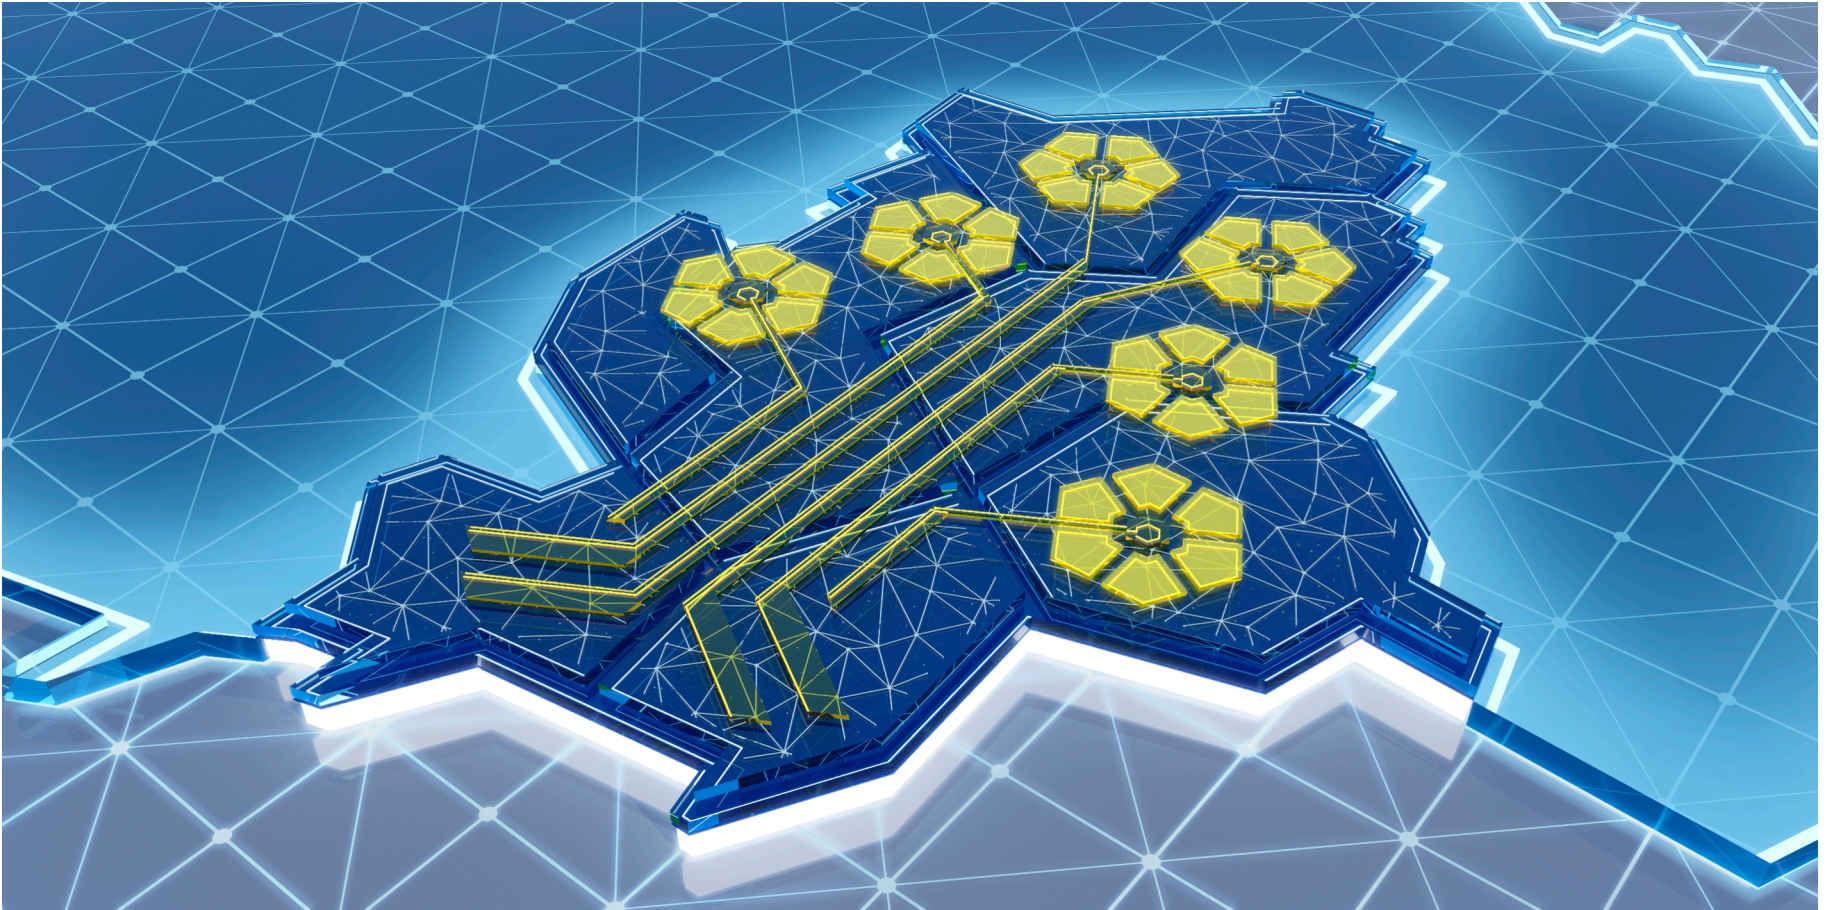

All historical wheels got through it.

It tested all kinds of tests.

It is strengthened by the hardest trial.

In the conditions of contemporary world it is priceless.

Lina Kostenko

THE ONLY AND THE BEST

10

THE ONLY AND THE BEST

This publication is about the integrity and unity of the communities that form the Donetsk Region, constitute the economic strength, create the platforms for innovation and implementation of them, maintain and strengthen the connection of culture, education and communication with the world.

Human capital asset: community initiatives, voluntary activities, artistic projects, professional clusters, hubs and coworkings that join everyone together.

The coherent picture is accompanied with environmental resources, infrastructure facilities and a positive business image. In conjunction, this can mitigate all possible investment risks. This coherent picture is an attribute of our region and Ukraine in the world and it consolidates the Ukrainian nation among its peoples.

This publication is about the reunification of Donetsk region.
It is about what Donetsk region can offer Ukraine and the world.
